

# Interaction's

Human's and Machine

# Examples of Human - Machine Interaction

Human > Machine

## Calculator

A calculator gives the final output only when specific buttons are pressed, showing a high dependency on human input.

Machine > Human

# Washing Machine

A washing machine operates automatically based on the combination of buttons pressed, requiring minimal human intervention.

**Machine = Human**

# **Manual Car**

A car exemplifies equal influence between human and machine, as every action or pressure applied by the driver results in a corresponding response from the vehicle.
